

You are invited!

Integrating ESG into the Investment Process - Opportunities for South Africa

October 27, 2011 | LiveMeeting

The panel discussion will be moderated by Gareth Allison, Vice President of Business Development - South Africa. Panellists include:

- Noel Friedman, Head of Business Development, MSCI ESG Research
- Roger Urwin, Global Head of Investment Content, Towers Watson
- Graham Sinclair, Principal, SinCo
- Adrian Bertrand, ESG Manager, Government Employees Pension Fund of South Africa

The world of investment is changing: asset owners and managers are becoming increasingly aware of the potential risk and value impact of environmental, social, and governance (ESG) factors, and their potential effect on an investment profile.

But what's really involved in incorporating ESG factors into investment decisions? Can they make a material difference to investment performance? And just how do investors go about holding their investment managers to account for integrating ESG strategies into the investment decision process?

MSCI cordially invites you to a webinar where our experts will address these questions and discuss how ESG factors can potentially add value or mitigate risk across an institutional investment portfolio.
